SELECTED.

THE WANDERER.

A wanderer on this world of waves,
In vain the little swallow craves
Some clime of spring;
Then how she eyes the watery waste,
Till lighting on some friendly mast,
She rests her aching wing.

Thus have I wander'd far and long,
The barren world's wide waves among,
In search of peace!
I found it not—till from afar
Arose the holy eastern star,
And bade my sorrows cease.

Now near the altar of my God,
I choose my safe and blest abode
From morn till even;
Oh, still upon its hallow'd breast,
My heart shall build her lowly nest,
And find an earthly heaven.

TO THE PUBLIC.

Having observed in the last New-York Columbian, received at this place, a paragraph stating that the cadets of the United States Military Academy had mutinied, and that I had promoted it, or at least had countenanced it, I deem it a duty which I owe to myself, to the gentlemen cadets, and to the public, to give a correct but summary statement of the transactions here, which have been stigmatised with the name of mutiny, accompanied with such observations as may appear necessary, and thereby to contradict a report so false, so base, and so malicious, & so injurious to the reputation of the Military Academy.

The following are the facts.

I arrived in the Steam-boat, at this place, from New-York, on Friday, the 29th of August, about two o'clock in the afternoon. Immediately after being landed, I proceeded from the dock (accompanied by several officers of the post) up to the plain for the purpose of reporting myself to the commanding officer, Brevet Major Sylvanus Thayer, of the corps of Engineers. When I arrived on the plain I saw a considerable number of cadets standing at a little distance, who as they saw me, uncovered their heads and gave six hearty cheers.—The cheering being finished they immediately advanced, and with the mild expressions of undisguised friendship beaming on their youthful countenances, shook me heartily by the hand, and with an affection almost filial, enquired relative to my health and welfare. As soon as the friendly salutations were over, they retired to their quarters with the most perfect decorum. My feelings were so much affected at the warm attachment manifested towards me by these generous youths on this occasion, as almost to deprive me of the power of utterance, and consequently to prevent my reciprocating in a proper manner their expressions of friendship. I accordingly the same evening, requested one of the officers of the Military Academy, to present to the young gentlemen, in my behalf, my unfeigned acknowledgements for the affectionate attachment they had so often (on many former occasions) manifested towards me, and to assure them of the sincere regard I entertained for them all: with this request he complied; in consequence of which I am informed, he has been accused of making seditious speeches and exciting mutiny.

On the following day an order was published on parade, stating that I took upon myself (for the present) the command and superintendance of the Military Academy, as being the senior officer of Engineers present.—As soon as the order was read and the parade dismissed, the young gentlemen gave three cheers, and immediately retired without any disorder or confusion. I shall not, at present, enter into any detail relative to my taking upon myself the command as already stated; but would merely observe, that this event had no connection whatever with any of the transactions in which the gentlemen cadets were concerned. No force was employed or contemplated by me on this occasion; it was an act of my own performing without any concert with any person. I even do not believe that any person at the post (except Major Thayer) had any knowledge relative to my intending to take the command, until the order for that purpose was published. The right which I had to the command, and the reason why I thought it necessary to exercise that right, will be made known at some future time. The foregoing is a summary but correct statement of the transaction at this place, in consequence of which the gentlemen cadets of the military academy have been stigmatised as mutineers, and myself as a promoter of mutiny! If giving vent in a regular, decorous and customary manner, to the noblest feelings which adorn human nature, those of genuine friendship and respect, constitute mutiny, then are these young men guilty of it—otherwise not. If reciprocating these noble feelings in a becoming manner, be promoting or countenancing mutiny, then am *I guilty,—otherwise not.* An impartial public will decide impartially respecting it; and I feel very confident, that with all honorable persons, there will be but one opinion on the subject.

The cadets of the Military Academy have no disposition for mutiny. I know them well. Many of them have passed from youth to manhood under my particular care. I pledge myself that they will always take pleasure in obeying and respecting their officers and instructors; but, I also pledge myself that no system of monkish or inquisitorial tyranny will ever reduce them to such an abject state of degradation, that they dare not express, in a correct, a decorous, and a customary manner, the noble affections of the heart. To such conduct, narrow and jealous minds, which are entirely devoid of the generous feelings that dictate it, may attach the terrific name of mutiny as they please, but it will not avail.

I am not ignorant of the source from which this base calumny has emanated—it is from the same foul source whence many other falsehoods equally malicious, but not of equal importance, have flowed. Let not the contemptible being, however, who has dared thus to calumniate the members of this institution, imagine that his own insignificance will screen him from detection and justice. Let him conceal himself with the utmost caution.—Let him shrink back (if possible) into something less than his original nothingness—still it will not avail—he will eventually be dragged forth to public view, and exposed in all his natural and acquired deformity. After having been a member of the Military Academy about twelve years, and after having devoted about ten years of the best part of my life in endeavouring to promote its interests and prosperity, it can hardly be supposed that I should feel indifferent as to its final fate.

It has now become absolutely necessary, that it should be definitively decided, whether a correct military discipline is to pervade every department of the Seminary, without which it cannot long exist, and also whether those persons belonging to it who have zealously endeavoured to promote its weal, interest, and prosperity, are to be protected and shielded from indirect and insidious persecution; or whether its destinies are still to be influenced by the intrigues and cabals of a MAN, who, as I am credibly informed, was, not many years ago, *dismissed* from public service on account of his *debauched* and *immoral* conduct; of a MAN, who now stands openly accused before the public of both *forgery* and *perjury*, as well as of other conduct, the mere mention of which, would wound the delicacy of the public ear; of a MAN, who has allowed some of his own family, in his hearing and even in his presence, to bestow upon the commanding officer of the Military Acad'y, epithets the most vulgar and abusive, and to declare that the cadets should be induced (as far as possible) to break his orders and regulations: of a MAN, finally, the general tenor of whose conduct, since he has been attached to the institution, has been to instill into the minds of the cadets principles of immorality and infidelity by openly & repeatedly making use of profane language in their presence—by speaking disrespectfully of the holy christian religion; and by openly extolling the writings of that prince of modern infidels, Voltaire.—On the decision upon this point depends the fate of the Military Academy—presuming it will be correct, I subscribe myself very respectfully, the public's obedient servant,

A. PARTRIDGE,
Captain of Engineers.

West-Point, Sept. 5, 1817.

TARTAR AND BRIMSTONE.

Old Shuter, the comedian, having a dispute in the green-room with Mrs. Yates the actress, "Madame, (says he) I have heard of *Tartars* and *Brimstones;* but, it must be acknowledged, you are the *cream of the one and the flower of the other.*"

ALEXANDRIA:
THURSDAY, SEPTEMBER 18, 1817.

The scarcity of food and other distresses in England being somewhat abated by the propitious appearances of the new harvest, the disturbances arising out of them which so long kept the court, the Parliament, the magistrates, and the printer's devils on the alert, have also subsided, and left the perturbed spirits of the daily press in that country to roam *abroad* for subjects to keep them in motion: and now we may look to have an endless train of discordant jargon about South America; in the course of which the Patriots will succeed and be defeated, and the Royal cause be ruined and triumphant at least three hundred times in the course of the ensuing year. With equal certainty may we anticipate alternate censure and applause, good wishes and execrations, which will be poured forth with all the devotion of which the scribes of the court, and the scribes of the malcontents, and all persons of that kind of piety and virtue are capable.—The American reader, however, will do well, to receive them only as so many specimens of newspaper poetic prose, in the composition of which the invention of the writers, is the most valuable and extraordinary of their materials. The real truths and genuine matters of fact which occur in the political world would not supply the columns of a small weekly paper with subjects worth the trouble of perusal. We are therefore, in contemplation of our *amusements* somewhat indebted to the daily tale mongers & romance writers—but let not our admiration of their invention and gratitude for our entertainment carry us beyond the bounds of discretion, or induce us to regard any of those excitations of European fancy, as worthy of belief, until we have some higher authority for their truth than the veracity of paragraphists.

The profound gravity and amiable sincerity with which those high authorities commend and recommend, advise and dissuade their rulers from or to this conduct or that, is not the least amusing part of their character. Hear one of them speak and you would imagine that the sovereign power and its cabinet of counsellors hung upon him to catch the decrees of wisdom and sound policy dropping from his lips.

"Whatever be our sentiments respecting the struggles for independence in Spanish America, (says one which appeared in Monday's National Intelligencer:) we shall neither countenance rebellion on the one hand nor despotism on the other."—Without waiting to utter a comment on the hardness of heart which could induce this paragraphist to withdraw from all the parties in this contest the important aid of *his* countenance, we cannot help wishing that in extracting the passage, the American editor had specified the name of the paper from which he took it, that we might be so far at least, enabled to form a presumption respecting the kind of rebellion, and the kind of despotism therein particularly intended. Whether it is the despotism of the Patriots or of Ferdinand—The rebellion of the colonial subjects against their king, or of the king against his colonial subjects. The time has been, indeed, when this would require no explanation—when even in imagination Patriots could not be conceived guilty of despotism, nor rebellion be imputed to kings:—But in these times of change, and mutual interchange of character, when the old subjects of contention, privilege & prerogative have so much trucked with each other, that if their forefathers were to come from the dead, they would not know one from the other, and the dullest casuist might maintain a tough argument, like Dean Swift's about the Pied horses, to shew that they were neither black nor white—and when Patriots are as despotic and intolerant as Ferdinands, and Ferdinands as rebellious against right and virtue as the vilest French revolutionist in the reign of terror—it is impossible for us on this side of the Atlantic to tell what an English paragraphist means by either of those terms, or to whom he applies it, unless we have the name of the print annexed in which it was published. If it be in the *Courier* rebel means Patriot—if in the Morning Chronicle, despot means king. Be it which it may, however, it must be consoling to every good heart to find that the discretion of the British ministers on the occasion is guaranteed to us by the high authority of this confident scribe. "We have no doubt (says he) but ministers will act *discreetly* upon this occasion, but we deem it our duty to submit *the subject* to their attention."—which subject is neither more nor less than that English officers in considerable numbers were at that moment on board a ship at Plymouth going to support the Independents in S. America—It is not the least striking part of this case that a ship with a large number of British officers on board *lying at Plymouth* and bound to South America should be entirely unknown to ministers, till a London paragraphist gives them information of it from his garret in Grub-street.

Then comes another paragraph taken from 'The Seine,'—stating that the courts of Europe are entering into engagements, and invite the U S of North America to join, *not only not to afford any kind of assistance to the people of S. America,* who are in a state of insurrection, but entirely to break off all intercourse with them.—Whether this paper called the Seine, be French or not, the contents, so far, are not very credible;—but if they be true, we are sure that the invitation held out to our country will not be accepted by our government farther than has already taken place. Our government has not afforded any kind of assistance to the Independents of S. America—but will hardly go so far as to break off all intercourse between them and the people of the United States. On this occasion we will venture to speak as confidently for our president, as the London paragraphists has for the British ministers, and declare that "we have no doubt but they will act discreetly on this occasion." To break off all intercourse with the revolutionists would be a virtual violation of that neutrality which all nations are bound to respect in decency and principle; and this nation above all others, in justice, honour, sympathy, recollection of the past and fellow feeling.

We are informed that the Franklin 74, commodore Stewart, is under sailing orders, and will leave the Delaware as soon as the hon. Richard Rush is ready to embark. The Franklin is to convey Mr. R. to London, who is appointed Minister Plenipotentiary to the Court of St James After landing the minister, it is said she will visit the Mediterranean. *Philad. p.*

THE FISHERIES.

It is stated in the Salem Gazette, that, during the week ending on Friday, the 5th inst. there arrived at Marblehead from the Grand Bank, about 80 sail of fishing schooners, with from 15 to 22,000 fish each. The same paper adds, that the sch. Friendship, Hammond, arrived there a few days since with a fare of 83,000—the greatest ever carried into that port.

Captain Foster, of the brig Fox, who arrived at Gloucester on the 6th inst. in 25 days from Surrinam, states, that it was very sickly at that place when he left it.

It is stated that captain Broke, who commanded the Shannon when she took the Chesapeake, has never recovered from the wound he received in the head at that time; but continues an invalid, and, at times, has his mind affected.

The trade of the United States is so much embarrassed for want of employment at the present period, that we think a commercial mission to Turkey, for the purpose of opening a communication to the Levant and the Black Sea, would well deserve the attention of the President and Senate at the next session of Congress. We have reason to believe that a resident minister from the United States would be singularly agreeable to the Porte; and the new channels of commerce thus opened to American enterprise and activity, would afford them at least an equal profit with the ships of any other nation on the globe.

[*Boston Intelligencer.*

New-York, Sept. 15.

FROM THE STRAITS.

Captain Gallop, from Genoa and Gibraltar, informs, that on the 2d of July, the American squadron was at Leghorn, and that the Plague raged at Algiers and Bona. In consequence of which, the communication between Gibraltar and the above ports was cut off. Captain G. adds, that the intercourse between Gibraltar and all the ports up the straits was prohibited on account of the plague.

From the National Intelligencer.

TO THE LEARNED THROUGHOUT THE WORLD.

Baltimore, Sept. 18.

In the general frivolity of the age, it is a great pleasure to observe some geniuses, guided no doubt by a higher destiny, turning themselves to solid learning.—The following profound and curious disquisition, though without pretension to wit or classical learning (which, under our system of education, are fortunately nearly obsolete) in point of solid argument and rational conjecture, is in my judgment, little, if any thing, inferior to Bayles' thoughts on a comet. It should be read and studied by all inquirers after physical truth, who are yet unhappily ignorant of the true history of the late sea serpent; who have never enjoyed the luxury of finding the longitude by magnetism, and who know not the satisfaction of discovering the true time by having a key on the finger, or holding a fire-penny bit in a glass. These three phenomena now nearly dividing the public interest, I shall forbear no longer (since the existence of the sea serpent is put beyond dispute) to publish the following erudite and sagacious reflections on them, for the benefit of the present age, and of the latest posterity. The letter which is subjoined is evidently from the pen of a celebrated philosopher, to whom the republic of letters, like that of politics, is already eminently indebted for literary diversion. —

Program of a memoir to be read to the Society of Natural History of N. York.

It has been considered by the learned to have been a happy conjunction of circumstances which gave to the world as great a philosopher as Sir Isaac Newton at the same time that the wonderful comet of 1689 appeared. It is doubtless a great happiness for the cause of science that the three greatest natural wonders which have occurred for a century should come to pass while our illustrious modern star, ——— ———, M. D. L. L. D. is still above the horizon. The public can not fail to be grateful to me for publishing the opinions, and thus faintly reflecting the light of that great luminary on I. The appearance of the strange sea monster; II. The new scheme for finding the longitude by a magnetic sphere; III. The modern, patent, astronomical chronometer. For the better satisfaction of the curious reader, I shall give the precise words of my learned correspondent.

New-York, August 31.

DEAR SIR,—I am not at all surprised at the appearance of the great serpent off Cape Ann harbor. I had already anticipated the probable existence of this interesting link between the *boa constrictor* of Africa and the *serpens oceanus magnus* of the white sea. From your accurate description, it evidently belongs to the class *amphibia*, order *serpentes*, natural family *heterodermata*, and I propose to give it the generic name *ophiuchus*, with the specific qualification *aquaticus* or *alis*. He may, indeed, vie with his great rival of the heavens, ophiuchus begins in latitude, longitude, and every physical dimension. Philosophers have shown more astonishment on the appearance of this *non descript* than could be suppose in the present advanced state of natural science, when we already know enough to divine all the rest, as, from having three terms given in proportions, we can calculate the fourth. This vulgar amazement arises from our not remounting to the stores of antiquity, and tracing back historically *per mutatas formas*. Some have credulously supposed this beautiful and interesting aquatic to be the *chimæra* of the ancients. Nothing could be more unphilosophical. The only *chimæra* known to the ancients was notoriously killed by Bellerophon; and, consequently, the moderns have no *chimæras* at all, though ignorant persons still suppose them to exist. Besides, Hesiod, who was nearly cotemporary with Bellerophon and the *chimæra*, and who had probably seen *chimæra's* skin* (as Pliny did that of the serpent of Regulus) in his charming Theogonia, describes the *chimæra* as having three heads, whereas no species of *ophiuchus* has as yet been detected with more than one head. The origin of our curious visitor is not so fanciful. It is now generally allowed that Bellerophon, when flying to Heaven on Pegasus, was not thrown by a bee stinging his horse, (for he was so excellent a rider that he was surnamed *Hipponous*;) but a ridiculous fiction has been confounded with a historical truth, and instead of Icarus having his wings melted off by the sun, Pegasus had his burnt to ashes, and he and his rider fell together into the Atlantic ocean. This is the reason why modern poets ride wingless steeds. Pegasus we all know, was like Rozinante, a horse at all points, and, being once at home in the sea, soon made love to the *Balæna, Physeter*, and other genera of cetaceous aquatics; who are known to our enlightened modern philosophers to belong to the class *Mammalia*, and, therefore, to be little different from horses, men, monkeys, and leather winged bats. To the latter Pegasus was the more nearly allied, because he had wings. Indeed, from the most authentic accounts, he was little more than a leather winged bat, as large as a horse, with a mane and tail. The hybrid born of this union, which, with many others, was capable of perpetuating its species, soon multiplied in bays and gulfs, losing the fins of the whale and the legs of the horse, if Pegasus had any, which is doubtful, as he seems to have been one of the *Cheiropterous Mammalia*. This mongrel, however, retained the *man* of the horse, which has ever since been observed to be an appendage to the

* See this question fully discussed in Loesler's learned note on this passage of Hesiod.

* See Swift.

he following profound and curious dissition, though without pretension to it or classical learning (which, under r system of education are fortunately early obsolete) in point of solid argument and rational conjecture, is in my dgment, little, if any thing, inferior to ayles' thoughts on a comet. For the better satisfaction of the curious reader, I shall give the precise words of my learned correspondent.

New-York, August 31.

Dear Sir,—I am not at all surprised at the appearance of the great serpent off Cape Ann harbor. I had already anticipated the probable existence of this interesting link between the *boa constrictor* of Africa and the *serpens oceanus magnus* of the white sea. From your accurate description, it evidently belongs to the class *amphibia*, order *serpentes*, natural family *heterodermata*, and I propose to give it the generic name *ophiucus*, with the specific qualification *aquaticus borealis*. He may, indeed, vie with his great rival of the heavens, 'ophiuchus huge,' in latitude, longitude, and every physical dimension. Philosophers have shown more astonishment on the appearance of this *non descript* than could be supposed in the present advanced state of natural science, when we already know enough to divine all the rest, as, from having three terms given in proportions, we can calculate the fourth. This vulgar amazement arises from our not remounting to the stores of antiquity, and tracing bodies historically *per mutatas formas*. Some have credulously supposed this beautiful and interesting aquatic to be the *chimæra* of the ancients. Nothing could be more unphilosophical. The only *chimæra* known to the ancients was notoriously killed by Bellerophon; and, consequently, the moderns have no *chimæras* at all, though ignorant persons still suppose them to exist. Besides, Hesiod, who was nearly cotemporary with Bellerophon and the *chimæra*, and who had probably seen *chimæra's* skin* (as Pliny did that of the serpent of Regulus) in his charming Theogonia, describes the *chimæra* as having three heads, whereas no species of *ophiuchus* has as yet been detected with more than one head. The origin of our serious visitor is not so fanciful. It is now generally allowed that Bellerophon, when flying to Heaven on Pegasus, was cast thrown by a bee stinging his horse, or he was so excellent a rider that he has surnamed *Hipponous*;) but a ridiculous fiction has been confounded with historical truth, and instead of Icarus having his wings melted off by the sun, Pegasus had his burnt to ashes, and he and his rider fell together into the Atlantic ocean. This is the reason why modern poets ride wingless steeds. Pegasus, all know, was like Rozinante, a horse in all points, and, being once at home in the sea, soon made love to the *Balæna*, *physeter*, and other genera of cetaceous reptiles; who are known to our enlightened modern philosophers to belong to the class *Mammalia*, and, therefore, to be the different from horses, men, monkeys, and leather winged bats. To the latter Pegasus was the more nearly allied because he had wings. Indeed, from the most authentic accounts, he was little more than a leather winged bat, as large as a horse, with a mane and tail. The kid born of this union, which, with many others, was capable of perpetuating the species, soon multiplied in bays and grays, losing the fins of the whale and the wings of the horse, if Pegasus had any, which is doubtful, as he seems to have been one of the *Cheiropterous Mammalia*. The mongrel, however, retained the ears of the horse, which has ever since been observed to be an appendage to the

See this question fully discussed in Ogilby's learned note on this passage of Ovid.

Ophiuchus, though wanting in *Crotalus*, *Coluber*, and other genera. Thus Milton says of the serpent of Paradise, which was doubtless an *Ophiucus*:

"Of his head
His turret crest, and sleek enamel'd neck,
Fawning, and lick'd the ground, &c."

Licking the ground for salt is an *equine* propensity, and supports the hypothesis of *Ophiuchus* being of Pegasean origin. But this point is settled by the fact that the *Ophiucus* of Cape Ann has precisely the head and mane of a horse.

But the more natural phenomena any theory can explain, the more certainly is it a true theory. Now this hypothesis beautifully solves the great question of the origin of the singular marine animals miscalled mermaids; who are, in truth, no maids at all, but descendants of Bellerophon, who betook himself to the dolphins, as Pegasus did to the whales, and who seems very little to deserve Horace's epithet—*Castus Bellerophon*.

Let then this classical guest of Cape Ann cease to inspire terror. He is the first descendant of Pegasus who has visited our coast, and we only regret that he has lost his wings. The fire from his nostrils is a mere *deceptio visus*, and nothing more than the phosphorescent coruscations of the amusing infinitude of Medusæ, which sprung up with Pegasus from the blood of Medusa, and illuminate the paths through which he and his descendants swim.

The cornous protuberances which you describe about the *vertebræ*, *costæ*, &c. are *scutæ* or *squamæ* of an irregular form, and osseous consistence. The vast fangs of this Leviathan are probably purely ebarneous, though perhaps a little calcined by his fiery breath, if, as you suppose, he breathe flame of a white heat. So much for the serpent.

The longitude is a subject which has long occupied philosophical enquiry, and racked astronomical skill. The application of magnetism to so difficult a problem, does equal honor to our country and to my learned friend, Mr ——. I suppose the artificial, magnetised, terraqueous sphere, to turn, as it is moved east or west, just as one spur wheel turns another; magnetism being a species of spur, or, as the Latins said, *stimulus*, which meant any exciting force; spurs too, like magnets, are made of iron.—Should the experiment succeed, I know of no modern discovery, in scientific mechanics, of equal value. The project of the ingenious and erudite Mr. Winston,* was not on principles so philosophical.—Nor do I think even Mr. Redheffer's excellent machine near so simple or elegant. I have, however, thought of applying the newly invented chronometer of my learned friend and correspondent, Dr. ——, to this purpose. Its structure is extremely simple, and the *modus operandi* clearly deducible from the best established physical principles. It consists of a five-penny-bit tied to a string 6 inches long, held between the thumb and fore finger, suspended in a half pint glass, the elbow resting the while on the table. In this posture of affairs the five-penny bit begins its oscillations, and strikes the hour, minute, and second, to the smallest fraction, against the side of the glass.

It has been objected to this theory, that the faculty of ascertaining the hour is peculiar to particular individuals, like the second sight among the Scotch. This is an objection which nothing but ignorance could conceive and laziness propagate; for it is manifest that this, like every higher endowment, though the gift of nature to its favorite prodigies, yet that, like poetic genius, it may be acquired, by long application, by all. For this purpose professorships should be established in all our learned universities, for the instruction of persons of all ages and sexes, in finding the true time by the patent chronometer.

This would be a much easier method of finding the longitude, and much more conformable to the liberal spirit of modern enquiry, than the tedious and uncertain process of spherical trigonometry, or the immersion of Jupiter's satellites.—Then too the great object of Lord Bacon's inductive philosophy, which, as he said, would level wits, & leave no great superiority to the more exquisite motions of the spirit, will be accomplished, for a child could hold a string as well as Newton or La Place.

This noble invention may also be applied to many purposes of practical utility. Experience had taught, long before Hippocrates, perhaps as early as Esculapius or Apollo himself, that nothing is more essential in all the science of *Hygeine*, than the observation of regular hours for eating and drinking. A good grog watch, therefore, has long been a *desideratum* in the philosophy of domestic economy. This seems extremely apt to answer all the ends of so useful a machine. A tumbler or glass would perform the double duty of eximing the hour and holding the liquor. Even the five-penny-bit might, after striking the time, assume a vicarious function, & pay for the whiskey. The draught would quicken the circulation of the subtle fluid, which detects unconsciously the hidden hour, and thus time might be taken by the forelock, and led on a quarter faster in every hour, than our present lazy watches, with all their patent levers, will drive it. This would be so much clear gain to a craving stomach.

The other objections which have been made to this curious and valuable invention, are like that which has already been refuted, the mere suggestions of ignorant scepticism. It has been impertinently asked, "What connection can there be between the artificial and arbitrary divisions of time, itself a mere creature of mind, and having no influence on the principles of the material world, and the five-penny-bit tumbler and string?" This is another error, arising from our not ascending in such profound enquiries to the fountain head. The ancients, in fact, originally divided time just as nature had done, by means of the patent five-penny-bit, or grog watch. Nature separated the hours, man only numbered them. The sand glass was not, as has been ignorantly and vapouringly pretended by pedants, filled with sand, which ran through a hole, but it was called *sand glass*, merely because it was customary to stick it in the sand for greater steadiness, while the experimental philosopher was feeling in his breeches pockets for a five-penny-bit, or a six-pence, with which to begin his operations. That the first time piece or chronometer used by the learned, was nothing more than our patent watch, may be made appear by invincible arguments.

1. In the Greek language, *Chronon* (time) was said to be derived from *Kronos* (Saturn), because he destroyed his children, and time destroys its own productions. This absurd fable shows how vilified and calumniated philosophers have been in all ages. *Kronos*, or Saturn, instead of being a cannibal, the devourer of his own children, was a very amiable gentleman, who kept house first in Greece, and afterwards in Italy. He was a very exact observer of the heavens and taught astronomy to his son Chiron the centaur, who made the celestial globe for the Argonautic expedition. Saturn had of course occasion for accurate time pieces. The figure which has been incautiously supposed to be a scythe on the ancient medals of Saturn, was in fact his watch, consisting of a cut sixpence a little bent, tied to a string. With this and a glass he made his astronomical observations, and when done he gave his apparatus to the Corybantes as a rattle, to amuse Jupiter, and hence the monstrous fable of their beating kettles to drown his cries. Sometimes when he had no small change about him to find the hour, or buy a gill of whiskey, he used a bit of lead, which was from this time called *Saturnum*. The uppermost planet was also called, in honor of such a distinguished astronomer, *Saturn*, as we have since had with equal propriety the *Georgium Sidus*. *Kronos* being then the first measurer of time, time itself was called after him, *Chronon*.

2. If a doubt could still remain that the ancient sand glass was our modern grog watch, Horace, the most accurate of poets, and one who was never without a glass to learn the hour, and take a drink of wine, would put this matter finally to rest. In Lib. I, Sat. 5, he pathetically laments that before he and his friends could after a hot journey tie their mules, and pull out their five penny bits to find the hour, it had fled. For the words,

Dum æs exigitur, dum mula ligatur
Tota sibi hora)

can mean nothing else. Æs being as Pliny tells us a small Roman coin, and *æra Corybantia* are admitted to have been the cymbals of the Corybantes, which have already been shewn to have been our grog watch. Q. E. D.

To this demonstration I shall only add one other passage from Horace. Lib 2, Sat. 7. Priscus is represented as the most impatient person in the world, because he spent his whole time, nay even lived, in trying to force the hour with a nail or key, instead of a five-penny bit.

Vixit inæqualis, clavum ut mutaret horas.

These arguments may suffice to convince the most incredulous, that this last improvement in measuring time is only a recurrence to the original method of the ingenious ancients. They also refute an old dogma, *nihil simul inventum est et perfectum*, for the first invention was perfect.

Yours with great admiration and esteem

****** ********, M.D. LL.D, &c.

P. S. I had intended to write a commentary illustrating the text of our author, but, upon consideration, I find his argument too clear, and his reasoning too irresistible, to require elucidation.

Perhaps I may, if leisure allow, give a dissertation upon the best means of attack and defence of the Sea Serpent; with an inquiry whether Torpedos or Steam Frigates be preferable in Serpentine wars.

British & American Stationary.

JUST received, for sale by the subscribers, a complete assortment of STATIONARY ARTICLES,

CONSISTING OF

Superfine folio & quarto post, hot pressed, gilt and plain; best vellum and common foolscap paper, drawing, log, ironmonger's, large wrapping & blotting do.; a large quantity of quills of all prices, Dutch, English and American; very best inkpowder; Japan & India ink; Clout's durable do.; Crebore's and Humphreys' hot pressed eagle cards; invitation and visiting ditto, plain, gilt and embossed; best black lead and camels' hair pencils and crayons; Reeves's genuine colors in large and small boxes and single cakes; pen-knives of the very first quality, from one to eight blades, and desk knives; ivory folders; Egyptian, pewter, glass, plated and pocket inkstands of all sorts; gentlemen's and ladies' elegant real Morocco pocket books, silver mounted, with and without instruments; ladies' thread cases and work boxes fine and common; pocket books of every description; asses' skin tablets; sealing wax and wafers; sand and pounce boxes, and ink sand; counting house files and laces; violin strings, German & Roman; slates and pencils; India rubber; silver and plated pencil cases, wafer seals; plated spectacles; Gunter's scales and dividers; mathematical instruments in cases, and a great variety of room hangings.

THEY HAVE ALSO ON HAND,

A good assortment of charts; Blunt's West-India Atlas; coast pilot and Bowditch's navigator, of the latest edition; fine toned German flutes, with books of instruction for do. and all other instruments; a large assortment of music & music books; merchants' account books of every description; record ditto; cyphering and copy books; copperplate copies of very superior kinds; bibles, testaments, and common prayer books of all sizes and in all the various kinds of binding—all the Greek & Latin school books and classics now in use.

A general assortment of English and French School Books, Dictionaries and Grammars, too numerous for insertion—and a great variety of Children's Books, in quantity, with engravings, from the press of Samuel Wood and others.

☞ Bank Books of every kind made to any pattern in the neatest manner and of the best materials.

JAMES KENNEDY & SON.

september 6 stuthtf

Sales at Auction.

By JOHN JACKSON & Co.

On SATURDAY, at 10 A. M.

Will be sold at the auction room Union street, without reserve,

Superfine cloths, superfine cassimeres,
Superfine bombazettes, Madras hdkfs,
Black silk hdkfs, Bandanno hdkfs,
Irish linens, elegant linen damask,
Brown hollands, super cambric dimities,
Common do. shirting cottons, cotton balls
Cotton shawls, cotton cambrics, emerties
Domestic ginghams, checks and shirtings
Chambrays, velvets and cords, baftas
Buckskin and beaver gloves, mammodies
Super chintz shawls, worsted hosiery
Bundle and pound pins, kid gloves
Buttons, sewing silk, tapes, threads
Lace shirt buttons, super 5-8 cot. checks
Pocket hdkfs, cotton suspenders, calicoes
Bedticking, book muslins, knitting yarn
Irish dowlass, imitation shawls
Stockinetts, blue and white crapes
Superfine white, red and yellow flannels,
Cotton cassimeres, etc. etc.

N. B. The greater part of the above goods are of this year's importation, and will positively be sold low for the most they will bring—and every description of goods that is offered for sale will positively be sold. september 18

THIS DAY....September 18.

BY virtue of a deed of trust bearing date the 12th day of November, 1807, from William Hodgson, assignee of William Wilson, for the security of John Hopkins, I shall on Thursday the 18th day of Septr. next, expose to public sale, for ready money, at the Exchange Coffee-House, in the town of Alexandria, the following DEBTS and CLAIMS, viz.

The administrators of Cumberland Wilson, against John Hawkins, for	$ 450
William Wilson, vs. Gittings and Smith, and George Baird,	1800
Do. vs. Baldwin Dade,	1600
Do. vs. Ad. Stuart & Js. Muchett,	7500
Do. vs. George North and Co.	2170
Do. vs. John Koontz,	1200

A more particular description of the said debts and claims will be given on the day of sale, and the property sold will be conveyed to the purchasers according to the power vested by the said deed of trust in the subscriber.

THOS. SWANN, Trustee.

August 16 swts

Notice to whom it may concern.

THE Debts and Claims advertised in the Alexandria Gazette of this day, to be sold, by Mr. Thomas Swann, on the 18th of September next, are my property.

I conveyed those Debts and Claims to Mr. Swann in trust for the security of Mr. William Hodgson, but have never given to Mr. Swann or to any other person an authority to sell them.

WM. WILSON.

August 16—18 6t

UNION BANK stock for sale, or in exchange for Franklin Bank stock. Enquire of the printer. August 1

Twenty Dollars Reward.

LEFT my employ on Thursday the 11th instant, a servant boy, named SPENCER—he is about 15 or 16 years old, tolerably well grown, is bow-legged, of light yellow complexion, stammers when spoken to—he is probably lurking about town, and will no doubt try to pass for a free boy. I will give the above reward if taken more than ten miles from town; Ten Dollars, if taken out of the district, and Five if taken within the district.—I forewarn all persons from harboring or carrying off said boy, as I am determined to have such offenders punished to the extent of the law.

T. MOUNT.

september 17 3t

Thirty Dollars Reward.

RAN AWAY from my service, on the 10th inst. my mulatto house-servant GEORGE, between 18 and 19 years of age, about 5 feet 6 inches high, slender made, pug nose, bushy hair, half of one of his upper front teeth broken off—he is very artful and forward, and a capable house servant—he took with him a variety of clothing. I will give the above reward, if secured in any jail, so that I get him again, and will pay all reasonable charges if brought home. Masters of vessels and others are forewarned from employing or carrying off said servant at their peril. C. F. WHITING.

Morven, near Alexandria, september 13 } stuthtf

Fifty Dollars Reward.

RAN AWAY from the subscriber living at Columbia Court-house, Georgia, a negro man, named MINNY, about 30 years of age, 5 feet 6 inches high, dark complexion, grins when spoken to, remarkably bow-legged, and has a little impediment in his speech—he was formerly the property of Mr James Anderson, of Alexandria, and it is not improbable he may be lurking about Alexandria as he has a wife there, or he may have made for Philadelphia, and pretend he is free and shew free papers. I will give the above reward for apprehending and securing him in jail so that I get him again. CALEB LEUBANK.

september 8 d2m

To Rent,

THAT large WAREHOUSE on the north side of King street, between Union and Water streets, lately occupied by Messrs. Griffith and Brawner as an auction and commission warehouse.—Immediate possession will be given and the terms made known by

May 10 D. H. ALLEN.

For Sale,

A tract of Land containing 357 acres, more or less, lying on Occoquan Bay in the county of Fairfax and state of Virginia, adjoining the lands of Robert I. Thompson and William Mason. It is presumed those desirous of purchasing will view the land and for themselves judge of its pecuhar advantages. One third of the purchase money will be required in hand, the balance at 12, & 18 months, with a deed of trust to secure the payments.

Thompson F. Mason.

December 14.

Public Sale.

BY virtue of the power reserved to me, in my contract entered into on the second day of October 1816, with Jonathan Scholfield and Alban G. Smith, I will expose to public sale, at Port-Tobacco, on the 22d day of September, so much of that tract or parcel of Land, called

The Desert Enlarged;

Situate and lying in Nanjemoy, Charles county, as will raise the sum of two thousand two hundred and ninety-three dollars, sixty-six and two-thirds of a cent, being the balance due me on the sale to the said Scholfield and Smith, of the above lands. GEO. FORBES.

Piscataway, Sept 4 dts

Tanners Attend!

ON the 19th day of the ninth month, (September) if fair, if not, the next fair day, I shall sell at public auction to the highest bidder, on the premises, my TAN YARD & DWELLING HOUSE, at the town of Occoquan. The tan yard consists of 44 vats, a good currying shop, patent bark mill, hide mill, extensive bark houses, &c. and is supplyed by a never failing spring. Chesnut bark is plenty at $7 per cord, and hides are brought by water from Baltimore, Alexandria, and elsewhere, to the spot. The dwelling house is large and convenient, with a good meat house, dairy, &c.

One third of the purchase money will be required in sixty days, the balance in one or two years, with interest from the date, but a discount of 10 per cent. will be made for cash. JACOB JANNEY.

Occoquan, 8th mo. 28 thstuts

Public Sale,

Of Dwelling Houses and Land.

I WILL offer for sale, at public auction, at the Exchange Coffee-House in Alexandria, on the 2'd of September, instant, at twelve o'clock, M. a two story Brick Dwelling House and Lot, on the east side of Washington-street, in Alexandria, between Prince and Duke-streets, being the southernmost house of three two story brick houses built by Jonathan Scholfield. The title is clear.—One thousand dollars will be required on the first of February next, and the residue in four equal annual payments thereafter—the whole purchase money to be satisfactorily secured and to bear interest from the first of October next, when possession will be given. ALSO,

A Dwelling House and about 253 acres of Land, in Fairfax County, within three miles from Alexandria, more than one-third of which is woodland. The dwelling house is of wood, well built, & may make a comfortable and very healthy residence. The land is capable of great improvement by the use of plaster and clover. ALSO,

Thirty-eight and half acres of Wood-Land, about half a mile nearer town, and affording a handsome scite for building.

For the house & land in Fairfax county five hundred dollars will be required in hand, one thousand dollars on the first of July next, and the residue in six equal annual instalments thereafter—the whole purchase money to bear interest from the day of sale, and to be satisfactorily secured.—For further information apply to W. CRANCH.

P. G. MARSETLLER, Auct'r.

september 16 dts

A valuable Farm for Sale.

THE SUBSCRIBER will sell, on reasonable terms, a valuable and productive farm of 600 acres, or thereabouts—being part of the lands of the late Richard Brent, lying on Kettle Run in the county of Prince William, in the state of Virginia—20 miles from the Occoquan Mills—33 miles from Alexandria, and about the same distance from Georgetown and the City of Washington. This farm lies in the centre of an excellant neighborhood—is handsomely situated—abundantly watered, and has upon it an ample proportion of wood. The soil is naturally strong, and a considerable portion of it has for some years past, been cultivated according to the most approved rules of modern husbandry—Possession will be given on the first day of January next. The terms upon which this property will be sold, will be made known upon application to George L Brent, of Stafford County, Va. or to the subscriber living in Alexandria.

JOHN D. SIMMS.

september 6 tf

Public Sale.

WILL be sold, for cash, on the 15th day of October, 1817, in the town of Dumfries, at the late residence of E. JOSEPH HUBER, deceased—

All the Stock of Leather,

About six thousand dollars worth—consisting of seal, upper, bridle and harness leather; also, rip, calf, hog, and lamb skins, all of which is in the rough, in good condition and nearly tanned. It will be worth the attention of curriers and tanners from a distance.

N. B. At the same time and place, the TAN-YARD will be rented for a term of years. The terms will be made known at the sale if not previously rented.

GEORGE F. HUBER, Adm'r.
of E. Joseph Huber, dec'd.

Dumfries, sept. 8 mwfts

Fauquier Land for Sale.

THE subscriber offers for sale his farm, called "CULLINS," situated in the county of Fauquier, on Kettle Run, and adjoining the lands of Messrs. Samuel Weaver, Jacob Weaver, and others, 7 miles from Fauquier Court House, 33 from Alexandria, and 3 from the Buckland Mills, containing about 400 acres; a considerable portion of which is now in very heavy timber, the balance cleared and in cultivation, including about 80 acres of the first quality bottom land, which, with a small portion of labor, might be made to produce a large quantity of hay. This land lies well, and is in a good neighborhood, and finely watered, Kettle Run passing thro' the farm. To a person disposed to purchase land for the purpose of cultivating and improving it himself, the above offers great advantages, as the *plaster Paris & clover* acts on no land more efficaciously than on this.

Also, one other farm, lying immediately adjoining, containing the like number of 400 acres; about one half of which has been cleared, the balance well set in timber.

The above farms will be sold together or separately, as may suit purchasers.—For terms, which will be liberal, apply to the subscriber, residing near the premises.

THOMAS BURGESS, Exr.

August 23 eo3w

ALEXANDRIA, July 31, 1817.

WAS committed to the jail of this county, as a run away, a negre lad, who calls himself JIM PHILIPS, and says he is free born, and that he was born in Culpeper county, Virginia, about 12 miles from Fauquier court house, and that his father's name is Armsted Phillips, and drove a waggon for a Mrs. Withers of that place: he is about 17 or 18 years of age, and 5 feet 5 or 6 inches high, and says he ran away from his father, and has followed the sea some time past. The owner, if any, is requested to come and prove his property, pay charges, and take him away, otherwise he will be disposed of as the law directs.

JAS. CAMPBELL, Jailor.

Alexandria, July 3.

WAS committed to the jail of this county as a runaway, a Negro man, who calls himself WM. BURRELL, and says he is free, and his mother lives near Aquia, Stafford county, Va. he is about 19 or 20 years of age; about 5 feet 6 inches high, rather slim made; his clothes blue and ragged—The owner is requested to come and prove property, and take him away, otherwise he will be disposed of as the law directs.

JAS. CAMPBELL, Jailer.

July 12

Notice.

Runaway from the subscriber in Cornwallis's Neck, a negro woman named Phillis, formerly the cook and market woman of Captain Richard Stonestreet, of Broad Creek—I have heard she wishes to get to Philadelphia. I will give One Hundred Dollars if taken in or about Philadelphia: Twenty five if taken in or about Baltimore, and Fifty Dollars if taken in Alexandria or neighborhood, and secured in any jail so that I get her again. I heard lately she was seen in Washington with her free husband, who calls himself William Adams.

Joseph N. Stonestreet.

February 22 tf

Twenty Dollars Reward.

WAS stolen from my pasture on the night of the 20th instant a very dark bay or black HORSE, 4 years old, about 14 hands high, with a star in his forehead, and a small lump raised under the hinder part of the saddle—no other marks recollected: he trots and gallops, but moves much like a colt. I will give five dollars if taken up not exceeding 10 miles from home; if above 10 miles, and not exceeding 20 miles, ten dollars; if above 20, and not exceeding 30 miles, fifteen dollars; and if above 30 miles twenty dollars will be given, with all reasonable expenses paid, if brought home to the subscriber, living in Charles county, near New Port, Maryland.

LEONARD WOOD.

August 28 6w

Celebrated for the cure of most Diseases to which the human body is liable,

PARTICULARLY

Worms	Head-ache
Coughs and Colds	Tooth-ache
Asthma	Corns
Consumption	Itch
Gout	R. Worms & Tetters
Diseases of the eyes	Inward weaknesses
Rheumatism	Nervous Disorders
Sprains	Female Complaints
Palsy	Hooping Cough &c.

For the prevention and cure of BILIOUS AND MALIGNANT FEVERS is recommended

HAHN's ANTI-BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, particularly in New-York Philadelphia Baltimore Petersburg Richmond Norfolk Edenton Wilmington Charleston and Savannah. The testimony of a number of persons in each of the above places can be adduced, who have reason to believe that a timely use of this salutary remedy has under Providence preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventative; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold if taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

Lee's Infallible Ague and Fever Drops

For the cure of agues, remittent and intermittent fevers.

Hamilton's Worm-destroying Lozenges,

Which have cured an immense number of persons of both sexes of every age and in every situation of various dangerous complaints arising from worms and from obstructions or foulness in their stomach and bowels,

This medicine bears no analogy whatever to others of similar titles so commonly complained of as operating with violence; on the contrary a particular excellence of this remedy is its being suited to every age and constitution. It contains nothing but what is perfectly innocent & is so mild in its operation that it cannot injure the most delicate pregnant lady or the tenderest infant of a week old should no worms exist in the body; but will without pain or griping cleanse the stomach and bowels of whatever is foul or offensive, and thereby prevent the production of worms and many fatal disorders. The lozenges are particularly efficacious in carrying off all gross humours and eruptions, feverish and bilious complaints, and are the safest and mildest purgative that can be used on any occasion

Description of Worms, and the symptoms by which they are known.

Worms which infest the human body are chiefly of four kinds viz.—The Teres or large round worm; the Ascarides or small maw-worm; the Cucurbitina or short flat white worm; and lastly, the Tænia or tape-worm, so called from its resemblance to tape. This is often many yards long and is full of joints. It is most hurtful and most difficult to remove.

Among the symptoms attending worms are—disagreeable breath, especially in the morning; bad and corrupted gums; itching in the nose, and about the seat; convulsions, epileptic fits, and sometimes privation of speech; starting and grinding of the teeth in sleep; irregular appetite. sometimes loathing food and sometimes voracious; purging with slimy and fœtid stools; vomiting; large and hard belly; pains and sickness at the stomach; slow fever with small and irregular pulse; a dry cough; excessive thirst; sometimes pale and unhealthy countenance, and sometimes the face bloated and flushed.

Persons afflicted with any of the above symptoms should have immediate recourse to Hamilton's Worm Destroying Lozenges, which have been constantly attended with success in all complaints similar to those above described.

A dose of this medicine given occasionally during the warm season, will effectually prevent the vomiting and purging of children—a dreadful disorder, which annually destroys thousands of the infant part of our citizens. It is likewise the mildest and most certain remedy known, and has restored to health and strength a great number when in an advanced stage of this fatal complaint. Particular and plain instructions are given for every part of the necessary treatment in such cases.

Children generally take this medicine with eagerness; having a pleasing appearance, and an agreeable taste.

Hamilton's Essence and Extract of Mustard.

A safe and effectual remedy for rheumatisms gout palsy sprains and bruises white swellings old strains and relaxations numbness and weakness of the neck pains of the side head ache swelled faces frozen limbs and every similar complaint It prevents chilblains or chopped hands and the ill effects of getting wet or damp in the feet.

The Genuine Persian Lotion,

So celebrated among the fashionable throughout Europe, is an invaluable cosmetic, perfectly innocent and safe, free from corrosive and repellent minerals, the basis of other lotions, and of unparalleled efficacy in removing blemishes of the face and skin freckles pimples inflamatory redness scurfs tetters ringworms sunburns prickly heat &c. The Persian Lotion operates mildly, without impeding the natural insensible perspiration which is essential to health, yet its effects are speedy and permanent, rendering the skin delicately soft and smooth and improving the complexion.

The Damask Lip Salve—Restorative Powder for the teeth and gums.

This excellent preparation comforts and strengthens the gums, preserves the enamel from decay, and cleanses and whitens the teeth, by absorbing all the acrimonious slime and foulness which, suffered to accumulate, never fails to injure and finally ruin them.

Hamilton's Grand Restorative,

Is recommended as an invaluable medicine for the speedy relief and permanent cure of the various complaints resulting from dissipated pleasures, juvenile indiscretions, residence in climates unfavourable to the constitution, the immoderate use of tea, frequent intoxication or any other destructive intemperance, the unskilful or excessive use of mercury, the diseases peculiar to females at a certain period of life, bad lyings in &c

Hamilton's Elixir for Coughs, Colds &c.

Celebrated for the cure of colds obstinate coughs asthmas and approaching consumptions and a certain remedy for the hooping cough.

Hahn's genuine Eye Water,

A sovereign remedy for all diseases of the eyes, whether the effect of natural weakness or of accident.

Toothe Ache Drops.

The only remedy yet discovered which gives immediate and lasting relief in the most severe instances.

Lee's Ointment for the Itch.

Warranted an infallible remedy at one application, may be used with perfect safety on infants a week old, not containing a particle of mercury or any dangerous ingredient whatever, and not accompanied with that tormenting smart which attends the application of other remedies.

Hahn's true & genuine German Corn Plaister.

¶*¶ The above celebrated MEDICINES are prepared at LEE's Patent Medicine Warehouse New-York—and sold whole-sale & retail at the Book-store of JAMES KENNEDY & SON, King street, who are sole agents for Alexandria.

☞ At the place of sale pamphlets may be had gratis, describing cures performed by the above medicines; the number, importance and respectability of which, fully justify every article of this advertisement. June 4
